

AMENDMENTS TO THE CLAIMS

1-25. (canceled)

26. (Currently Amended) A computer program product comprising:
a computer readable medium having computer readable program code
embodied therein, said computer readable program code configured to:
obtain a first business process data from at least one first trading
participant, said first business process data comprising a set of transaction
messages having a first data format in accordance with a first standard protocol
for conducting business transactions;
process said first business process data at a process management platform
accessible via an interconnection fabric, wherein said process management
platform is configured to manage the flow of said transaction messages and
monitor said transaction messages, wherein said process management platform
is configured to automatically determine a second one of a plurality of trading
participants to satisfy said first business process data;
generate a second business process data from said first business process
data using a second data format in accordance with a second standard protocol
for conducting said business transactions with said second one of said plurality
of trading participants; and

transmit said second business process data from said process management platform to ~~at least one second trading participant~~ said second one of said plurality of trading participants.

27. (original) The computer program product of claim 26 wherein said computer readable program code configured to obtain said business process data executes at a process gateway.

28. (Currently Amended) The computer program product of claim 26 wherein said process gateway interfaces with at least one legacy system at said at least one first trading participant and said second one of said plurality of trading participants ~~at least one second trading participant.~~

29. (Currently Amended) The computer program product of claim 26 wherein said process management platform broadcasts said first business process data to ~~[[a]]~~ said plurality of trading participants.

30. (previously presented) The computer program product of claim 26 further comprising:
computer readable program code configured to modify said first business process data to conform said first business process data to a uniform format.

31. (previously presented) The computer program product of claim 26
wherein said processing further comprises:

archiving said first business process data in a storage medium.

32. (previously presented) The computer program product of claim 31
further comprising:

computer readable program code configured to provide said archived first
business process data to an entity for non-repudiation purposes.

33. (previously presented) The computer program product of claim 26
wherein said first business process data comprises at least one partner interface
process.

34. (previously presented) The computer program product of claim 26
wherein said first business process data comprises technical information.

35. (previously presented) The computer program product of claim 26
wherein said first business process data comprises item acquisition data.

36. (previously presented) The computer program product of claim 26
wherein said first business process data comprises service acquisition data.

37. (previously presented) The computer program product of claim 26 wherein said at least one trading participant comprises an entity utilizing said first business process data.
38. (original) The computer program product of claim 37 wherein said entity comprises a purchaser.
39. (original) The computer program product of claim 37 wherein said entity comprises a supplier.
40. (original) The computer program product of claim 37 wherein said entity comprises a distributor.
41. (original) The computer program product of claim 37 wherein said entity comprises a manufacturer.
42. (original) The computer program product of claim 37 wherein said process management platform comprises a plurality of distributed systems.

43. (original) The computer program product of claim 37 wherein said process management platform comprises a business process interface associated with said at least one trading participant and said at least one second interface.

44. (original) The computer program product of claim 37 further comprising: computer readable program code configured to provide said at least one first trading participant and at least one second trading participant access to a business process interface.

45. (previously presented) The computer program product of claim 44 wherein said business process interface is provided via a web browser.

46. (previously presented) The computer program product of claim 44 wherein said business process interface facilitates the transmission of data comprising at least a portion of said business process data.

47. (previously presented) The computer program product of claim 44 wherein said business process interface facilitates the formatting of data comprising at least a portion of said business process data.

48. (canceled)

49. (canceled)

50. (canceled)

51. (Currently Amended) A computer program product comprising:

 a computer readable medium having computer readable program code for managing a plurality of business processes, said computer readable program code configured to:

 obtain a plurality of business processes from a plurality of first entities wherein said plurality of business processes comprises a sequence of messages linked by a predefined workflow and exchanged over a predefined period of time;

 manage said plurality of business processes at a process management platform;

 forwarding said plurality of business processes from said process management platform to at least one of a plurality of second entities, automatically determined to be configured to fulfill said plurality of business processes.

52. (Currently Amended) The computer program product of claim 51 wherein said computer readable code configured to manage said plurality of business processes at said process management platform further comprises computer readable program code configured to:

~~determine if each of said plurality business processes conforms to a predefined format and format each of said plurality of business processes so that each of said plurality of business processes conforms to said to conform to a~~ predefined format when said plurality of business processes does not conform to said predefined format;

~~determine whether to archive said plurality business processes and archive said plurality of business process if said determination to archive said business processes is affirmative.~~

53. (canceled)

54. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to validate said first business process data.

55. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to provide automatic translation of said second business process data based on protocol identifiers in one or more respective trading participant profiles.
56. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to process a general request in said first business process data, to determine one or more trading participants capable of satisfying said general request, and to route said outbound business process data to said one or more trading participants.
57. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to provide automated negotiation services between a plurality of trading participants.
58. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to evaluate and analyze said first business process data and said second business process data to provide business trend information to a plurality of trading participants.

59. (withdrawn) The computer program product of claim 26, further comprising computer program code configured to emulate a virtual trading participant for evaluating an interface between said process management platform and one or more trading participants.

60. (withdrawn) A computer program product comprising a computer readable medium having computer readable program code embodied therein for facilitating business processes via a process management platform, wherein said computer readable program code comprises:

computer program code configured to receive inbound business process data from a plurality of trading participants;

computer program code configured to transmit outbound business process data to said plurality of trading participants;

computer program code configured to validate said inbound business process data;

computer program code configured to provide automatic translation of said inbound business process data and said outbound business process data between a plurality of supported business data protocols based on protocol identifiers in one or more respective trading participant profiles;

computer program code configured to process a general request in said inbound business process data, to determine a subset of said trading participants capable of satisfying said general request, and to route said outbound business process data to said subset of trading participants;

computer program code configured to record said inbound business process data and said outbound business process data in a transaction non-repudiation archive;

computer program code configured to provide automated negotiation services between said plurality of trading participants;

computer program code configured to evaluate and analyze said inbound business process data and said outbound business process data to provide business trend information to said plurality of trading participants; and

computer program code configured to emulate a trading participant for evaluating an interface between said process management platform and one or more of said plurality of trading participants.
